# DERMALINE LIFTING THREAD

LIFTKING , COG and all the model's shaping machines were designed and developed by Our R&D team. Also in order to keep the best quality, we strictly control sterilization and drying and the other related processes under ISO standard.

## PRODUCT PROCESS

Dermaline, as global beauty market leading company, we constantly develop our products based on customer's needs. Dermaline team tries to satisfy customers through three core values: innovation, promise and interaction.

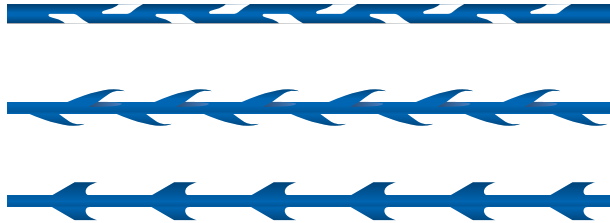

### LICENSE

# THREAD MATERIAL

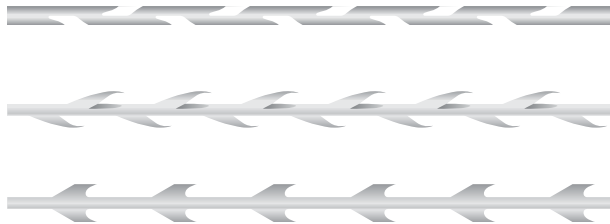

## ■ PDO (Polydioxanone)

- Inflexible supportive material
- Biodegradable

## ■ WPDO (Undyed PDO)

- Inflexible supportive material
- Biodegradable

## CANNULA TYPE

W TYPE

L TYPE

A TYPE

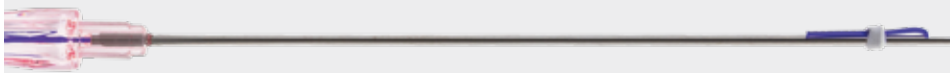

**\* Notice carefully**

Before procedure, make a hole big enough. Ensure that the threads must be on the skin side when the needle penetrates the skin.
