Luna

Turn back the time
of the most delicate skin
around the eyes

The skin around the eyes is the thinnest and most sensitive skin on the body and is one of the most vulnerable to photoaging and darkening.

One of the
Most
Sensitive Skin

The skin around the eyes
that shines brightly
like moonlight

iLLUMA Luna
is a dark spot control product
with PN as the main ingredient.

Using pharmaceutical-grade raw materials, it works
more safely on the sensitive skin around the eyes.

Dark Spot Control

HA PN Pentapeptide-13 Tripeptide-29 Diphenylglyoxal

1mL x 1 Syringe

EXPORT ONLY

iLLUMA Luna

Hyaluronic Acid + PN

iLLUMA Luna is a product in which hyaluronic acid is added to PN(Polynucleotide), increasing cell permeability.

HA gel is hydrolyzed is slowly released, increasing the active time of PN and consequently extending the duration of product efficacy.
